MESSAGE FROM CEO

Welcome to the Lockhart River Aboriginal Shire Council Operational Plan for 2014 – 2015 period.

The purpose of the plan is to provide organizational personnel – both internal and external with a clear picture of the tasks and responsibilities including key performance indicators expected of them to achieve during the year.

The Operational Plan is therefore a management tool that facilitates the coordination of the Council resources, human, financial and physical so that the goals set out in the plan can be achieved.

Staff are required to refer to the information contained in the plan as the basis for carrying out and implementing their duties. Also staff will be required to report against performance measures, key performance indicators/targets set out in the operational plan on a monthly, quarterly and annual basis.

There are many challenges facing Lockhart River Aboriginal Shire Council. As a Council, we face financial challenges that all local councils face in the current economic climate. In addition we face challenges of being a small remote indigenous Council with almost zero rate base, small revenue base and very little private enterprise operations.

The Council remains predominantly the most important employer, provider of services in the area. While we acknowledge these challenges, we will continue to work hard to find new and innovative ways of doing things, including where necessary introducing new charges and fees on the various services we deliver, eliminating wastes and inefficiencies at the work place and above all using the operational plan as a tool to inject better management and accountability into our operations. Through the effective implementation of the operational plan year by year, the community will incrementally move forward to its vision of ***STRONG PUUYA, STRONG CULTURE*** and ***STRONG FUTURE***.
