Fiber Optic and IT project

Council has endorsed the redesign of its communications network and supporting systems in order to develop an operational platform which will be resilient and capable of meeting need over the next ten years. A Fiber Optic underground distribution network to all Council work sites in Lockhart River will allow continuity of connectivity regardless of weather or atmospheric conditions. With the trend to on-line reporting to funding bodies this new installation removes a significant business risk for Council by taking advantage of contemporary technology. There are few suppliers of this technology.

That BizIT, On-Line Communications, and Active Voice be engaged to deliver the scope of works as described in the project plan.
